IVANO VITCH

- Ivano Vitch is an amazing athlete who's been preparing himself for a **marathon** up next holiday**;**

- He's been training constantly and **keeping record** of many aspects of his training practices with the help of an app.

- Despite Ivano exercise records, he doesn't know how efficient he could be;

- **Your mission is help him to extract the very best from his previous exercises history**.

- For this purpose you'll receive the workout history in a **CSV file** and a **Collab Notebook** to perform the data analysis;

- The data is composed of:
  - 567 entries;
  - 11 columns;
  - 49,3 KB (memory usage).

To **win the podium** you'll need to solve problems of different levels:

Easy problems (6)

Medium problems (2)

Hard problems (2)

marathon

Help Ivano win

Good Luck!
